

50mm blades venetians

Combining modern technology and traditional style, this uniquely individual blind is ideal for commercial and residential settings.

The timeless 50mm Classic Venetian offers clients a diverse range of potential design and shading solutions.

A modern 61 x 28mm head rail profile and designer finish sets it apart from others in the market.

In the case of large or multiple existing windows, customers may benefit by utilising the direct control of automation. Our motorised 50mm blinds incorporate a 60x60mm extruded profile and come with the choice of either perforated or solid slats. The Sheer Blinds Motorised

50 mm Venetian is unique in that it has no spool or spindle systems. Specially designed bearings used in conjunction with lifting tapes do away with the need for cords and help make tangles a thing of the past. No other manufacturer utilises this performance based and highly functional method of motorisation.

As you can see, the Blades 50mm is a blind aimed at complementing a wide range of architectural designs and applications.

Specifications and Features:

- Latest European designs and finishes.
- Chemically pre-treated and enamelled head rail systems, ensuring maximum paint adherence and resistance to corrosion.
- High grade copper-free, non-corrosive aluminium slats, to provide maximum strength and flexibility.
- All paints incorporate weather, light and U.V. stable pigments.
- The availability of perforated slatting, to allow limited light penetration, while creating a modern look.
- Colour co-ordinated accessories.
- The option of motorisation with either switch or remote control.
- The choice of either ladderstring or 25mm woven laddertape.
